

# Matthew Chuang

29 Goose Pond Road, Lincoln, MA 01773

(978)-201-2480

chuanm@rpi.edu

---

**Education** *Rensselaer Polytechnic Institute*, Troy, NY, class of 2019

- Bachelor's of Science in Computer Science
- GPA 3.34/4.0

**Coursework** Network Programming, Database Systems, Large-Scale Programming and Testing, Programming Languages (Prolog/Erlang), Intro to Algorithms, Principles of Software (Java), Intro to Open Source, Computer Organization, Foundations of Computer Science, Data Structures (C++), Introduction to Programming (Python)

**Skills** *Languages:* C/C++, Python, Java, HTML5/CSS3, JavaScript, SQL  
*Technologies:* Android SDK, Alexa Skills Kit, Github, Windows Batch, Linux Bash, Bootstrap

**Experience** *Bentley Systems - Software Developer Intern*, Exton PA, Summer 2018

- Worked under an agile software development process in the rebar team for the U1 and U2 releases of ProStructures CONNECT Edition platform
- Refactored aspects of the rebar codebase for better readability, organization, and ease for debugging
- Handled various defects and debugging tasks for 2D rebar drawings and labels, resolving fatal software crashes

*Amazon Robotics - Hardware Engineering Intern*, North Reading MA, January 2016

- Coded Amazon Echo internal demonstration software using Python, Bash script, AWS S3 Bucket and the Alexa Skills Kit to fulfill order requests from the warehouse floor to be delivered to an audience via robotic arm
- Created Amazon Echo demonstration for the March 2016 MARS conference delivering VIP guests their welcome packages via *Amazon Robotics* drive unit using Python, Bash script, AWS S3 Bucket, and Alexa Skills Kit

**Projects** *Rensselaer Center for Open Source - Web Technologies Group*, Spring 2018

- Implemented an email alert reminder system for Rensselaer Shuttle Tracker web site using Nodemailer, MongoDB, Express.js, AngularJS, and Node.js
- Worked with a multiple person development team using Github, and C9.io

*Amazon Alexa Skills Challenge: Kids - Country Flag Quiz*, January 2018

- Entrant in the DevPost Alexa Skills Challenge: Kids online hackathon sponsored by Amazon
- Built a world flags quiz skill utilizing Amazon Alexa and the accompanying Alexa smartphone app using Python and the flask-ask API

*Intro to Open Source - DidIt Android Mobile Application*, Spring 2017

- Intro to Open Source final project
- Utilized Android Studio and the Android SDK to develop a simple todo app for android
- Participated in a team of three, using Github source control, and collaborating in person
- Created graph visualization of input data using Open Source GraphView library
